

Meter Clamping Device

Meter Clamping Device

The convincing performance of the inotech test rigs for gas meters regarding the testing duration and the testing capacity is not only reached by the usage of the inotech process control (hardware and software), but also by the usage of the purpose-built meter clamping devices. Depending on requirements and the meter design, these devices can be engineered for multiple methods of control:

- manually operated via eccentric
- semi automatic
- fully automatic via pneumatic cylinder

The meter clamping devices you can get as single-user system or as multi-user system for domestic gas meters as well as for industrial gas meters.

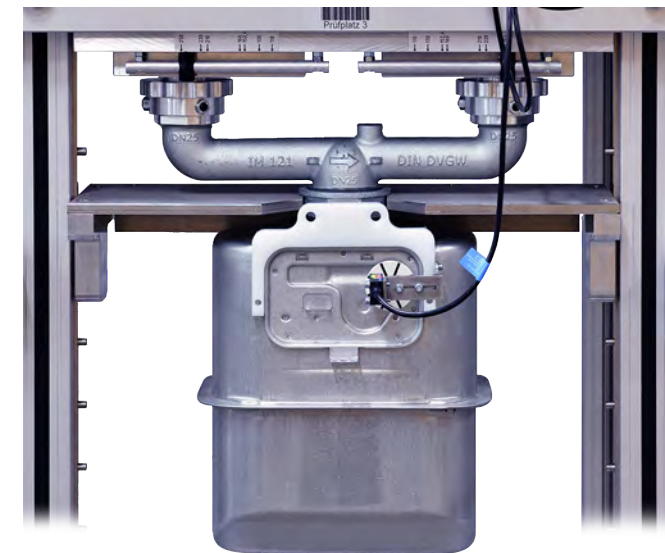

The constructive design of the devices enables clamping of a large number of different meter sizes and meter connections. This contains additional meter components as there are inlet sections or outlet sections or flow straighteners. The delivery range contains as well the upgrading of existing inotech test rigs or other brand test rigs.

Delivery range meter clamping devices:

- Domestic gas meters
(e.g. Diaphragm gas meters, Smart Meters, ...)

Maximum adaptability by the inotech meter clamping devices

- Industrial gas meter (rotary piston gas meters, turbine gas meters, supersonic gas meter ...)

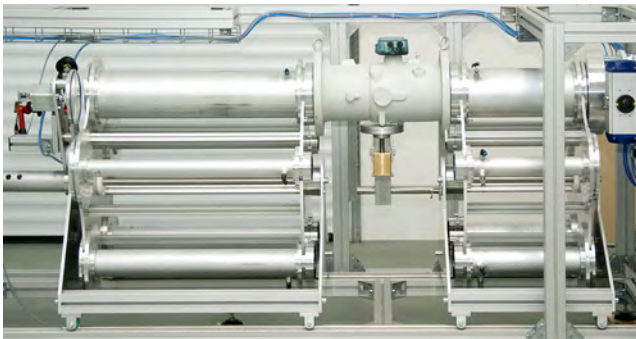

Delivery Range Meter Clamping Device

Greatest possible flexibility by the pipe in pipe system for nominal diameters in the range of DN25 - DN600

Rapid clamping system by the turret design for maximum 5 different nominal diameter up to DN150

PRODUCT RANGE

- Low pressure test rigs for domestic and industrial gas meters
- High pressure test rigs for gas meters designed as closed-loop or as bypass
- Mobile gas meter test rigs
- Modernization of test rigs
- Test rigs for gas pressure regulators
- Test rigs for water meters and heat meters
- Purging units
- Leakage test units

SERVICE PROGRAM

- Remote support and service support
- Spare parts
- Maintenance contracts
- Preventive maintenance
- Update service
- System availability service
- System extension
- Software support with customized adaptations
- Standard and tailor-made trainings
