

Update Service inotech Software PS8

Update Service inotech Software PS8

With the experience of 25 years in development, improvement and maintenance of meter calibration software, inotech Meter Calibration Service GmbH offers with immediate effect the update service of the inotech Meter Calibration Software PS8.

After conclusion of the contract the customer receives automatically every 1st quarter of a new calendar year the latest version of the calibration software. The update service can be ordered for each test rig that is equipped with the inotech software PS8.

The continuous improvement of the inotech Meter Calibration Software PS8 is based on a yearly release plan. The plan contains all features which will be available with the roll out of the next software update. The update service contract customers will be informed via a regular newsletter.

The update service provides the following services:

- One time per year an automatically update of the inotech Software PS8 on the test rig PC (via remote)
- The current update consists, if required, the adaption to a changed operating system
- The contract customer will get a 10% discount on all inotech software products and trainings.

The update service for the software release of

2018 offers among others the following features:

- Report the measurement uncertainty of each measurement point
- Comfortable and fast selection of the specified meter test program by using the scanner to detect either from screen or printout
