

PRODUCT RANGE

- Low pressure test rigs for domestic and industrial gas meters
- Closed-loop test systems for thermal gas meters
- Manufacturer test systems for metering stations
- High pressure test rigs for gas meters designed as closed-loop or as bypass
- Testing rigs for domestic and large water meters testing rigs
- Testing rigs for heat meters
- Testing rigs for electricity meters
- Mobile gas and water and electricity meter testing rigs
- Testing equipment for gas pressure regulators
- Flushing equipment
- Leakage testing equipment
- Testing equipment modernization
- Measurement data evaluation systems (InoCloud)

SERVICE PROGRAM

- Calibration services according to DIN EN ISO/IEC 17025:2018
- Remote support and on-site service
- Maintenance contracts
- Preventive maintenance
- Update service
- Spare parts deliveries
- System expansion
- Software support with customized adaptations
- Customer related trainings

Service Opportunities

Specification Service Program

The service program of the inotech Meter Calibration Systems GmbH with the experience of 30 years in maintenance, repair and modernization of test rigs provides all the services for your test rig that are necessary to assure a future proof and trouble free operation.

Our offer is available for all kinds of test rigs for gas meters, water meters or heat meters and many others

Put us to the test, we are sure that we can offer you a suitable service package.

The service program is classified in the following areas:

- Test rig support
- Test rig extension
- Test rig modernization (manufacturer independent)
- Test rig integration customized to your production processes

Test Rig Support

- Remote diagnosis with the specific inotech remote-software for the system inspection during operation as well as offline
- Spare parts supply for minimum 10 years
- Service on demand with short response times provided by our service engineers
- Remote maintenance with monitoring and control of the system parameters, of the measuring data and of the data administration

- Preventive maintenance with a periodic system inspection and exchange of the wearing parts
- Calibration service for the applied sensors and standards by the inotech inspection body or by a calibration authority incl. the offer of the installation of transfer standards to avoid a system downtime.

Test Rig Extension

- Extension of the measuring range
- Extension for additional types of meters
- Update service for the inotech Meter Calibration Software and the PC operating system
- Integration of third-party software
- Development of Customer specific software modules e.g. data analysis
- Data fusion and evaluation of several test rig data
- Measurement uncertainty budget

Test Rig Modernization (manufacturer independent)

- Installation of efficient meter clamping units
- Optimized counter reading and pulse recording
- Installation of the latest PC operating system
- Installation of the latest inotech Meter Calibration Software Test Rig Integration customized to your production processes
- Integration into the customer specific production and logistic processes
- Software for the data fusion and evaluation of several test rigs
- Monitoring and control of the test room parameters
- Test of meter components during the manufacturing process e.g. measuring units, the applied sensors and counters
- Integration into the customers specific logistics processes (conveyor and storage equipment)
- Fully automated test rigs for unmanned operation
