PS8 Software Release Q1 2019

inotech Meter Calibration Systems GmbH

inotech Meter Calibration Systems GmbH

The success story of the inotech test facilities is a success story of the inotech test software PS8 as well. For more than 25 years it has been consequently developed and maintained by our own developing team. In the process of time it has passed through various versions and has become more and more effective. I think, we rightly can be proud of this product, that is unique for all kind of test facilities at the world market by its specification and flexible application.

In the year 2018 we have decided to offer an Upgrade Service to enable you a simple and economical possibility to participate in the developments of the test facility software.

The Upgrade Service refers to the test facility and includes a yearly actualization of the test facility software. The very first upgrade service starts with the PS8 software release in March 2019.

Beside the continuous improvements and the adaptation to the various platforms and operation systems the release contains a whole bunch of performance characteristics and features. In a large part these are traced back to your valuable suggestions for which we owe a debt of gratitude to you. We really hope that you will support us in these developments by communicate your ideas and suggestions in the future as well.

What is new?

► New Look

- A brand new surface, fitting to the entire overall image of the company

► Handling

- Easier and quicker input of data
- Quicker selection of the test procedures
- Assistance functions

► Diagnose

- Diagnose screen
- Context sensitive help for the system messages
- Log function for the remote diagnostic and the on-site service
- Overview of the calibration validities or calibration intervals

What is new?

► Displays

- User optimized displays
- Additional information, as there is outstanding total test duration
- Redesigning of the line recorder
- Predefined process-oriented views

► New Functions

- Measurement uncertainty budget for each test point
- Support of the sampling inspection according to GM-VA SPV / 20.03.18
- Usage statistics
- Facility documentation
- Lucid test order management
- Dynamic leakage test

... and much more

PS8 Software Release Q1 2019

The mentioned innovations lead to an easier, quicker and more comfortable handling of the test facilities. Another focus is the improvement of the data management, to be capable to administer the huge data volume of the future in a more efficient way without any impairment of the performance of the test facility. The completion and tests of this development step will last the next few months. We will inform you in detail as soon as the software is available.

We hopefully have aroused your interest and created your curiosity and are at your disposal to answer your question about the software release as well as questions about the "Upgrade-Service Contract".

Ralf Schneiderat
CEO

PRODUCT RANGE

- Low pressure test rigs for domestic and industrial gas meters
- High pressure test rigs for gas meters designed as closed-loop or as bypass
- Mobile gas meter test rigs
- Modernization of test rigs
- Test rigs for gas pressure regulators
- Test rigs for water meters and heat meters
- Purging units
- Leakage test units
